# Your Life Insurance Proposal

ILLUSTRATION COMPANION

Prepared November 5, 2026 · Carrier illustration dated June 2, 2026 · Example Indexed UL

| Illustrated initial death benefit | Planned premium outlay | Planned payment period | Coverage guarantee |
|---|---|---|---|
| **$500,000** | **$15,000 a year** | **To age 120** | **To age 49** |
| Paid at the insured's death | As illustrated; not a guaranteed premium | Every year the illustration shows (81 years) | Only if premiums and policy activity follow the illustration |

## Why this proposal is being considered

You told your advisor the main goal is building cash value, with protecting family or beneficiaries as a second goal. This design from Example Mutual Life Insurance Company puts more premium into cash value than the death benefit alone needs.

## How the proposed policy works

### What the policy does

Example Indexed UL is indexed universal life insurance. Interest is linked to a market index, and the death benefit is paid to your beneficiaries when the insured dies.

### How it is funded

The illustration assumes a planned outlay of $15,000 a year through age 120. This is a planned amount, not a required premium.

GUARANTEED

**What is guaranteed**

The No-Lapse Guarantee keeps coverage in force through age 49 only if premiums paid stay at or above the required minimum. On guaranteed charges and rates, coverage is shown to age 81.

NOT GUARANTEED

**What is illustrated, not guaranteed**

The illustrated values assume an index-linked rate of 6.25% every year and current charges. They are not guaranteed; actual crediting can be higher or lower, including zero in some years.

## What to understand before proceeding

1. **Funding commitment**
   You told your advisor funding is not yet certain. The illustration assumes $15,000 is paid every year through age 120; paying less can lower the values and shorten coverage.
2. **Access to cash value**
   Net surrender value in year five is illustrated at $55,795, against $75,000 paid in. Surrender charges apply through year 10, so early access to cash is limited.
3. **Coverage after the guarantee**
   The guarantee ends at age 49, and on guaranteed assumptions coverage is shown only to age 81. Coverage to age 120 depends on non-guaranteed values if the illustrated rate holds.

**Source: carrier illustration dated June 2, 2026, pp. 1, 2, 3, 4.**

This companion summarizes selected information from the carrier's sales illustration dated June 2, 2026 for Example Indexed UL from Example Mutual Life Insurance Company. It supplements, and does not replace, the complete illustration, which contains the guaranteed and non-guaranteed values, their assumptions and the required disclosures. Non-guaranteed values are not guaranteed, and actual results may be more or less favorable. This is not a contract, a carrier document or a recommendation, and it does not address tax or legal questions.
